WHO WE ARE

Two decades of proven delivery.

Rust Control Limited (RUSCOL) is a wholly Nigerian engineering, procurement and construction company serving the oil and gas, marine and power sectors. From our Warri base we protect, build and maintain the assets that keep Nigerian energy moving.

STORAGE TANK REHABILITATION AND COATING, ESCRAVOS TERMINAL

We combine international standards with local capability. Our crews are certified, our procedures documented, and our equipment owned rather than borrowed, which is why blue-chip operators return to us for repeat scopes across corrosion management, pipelines and offshore fabrication.

Work is executed to API, ASME, ASTM, AWS, AWWA, NFPA, BS and the ISO 9000 to 9004 series, under a documented quality management system and a HSE regime targeting zero lost-time injury.

OUR VALUES, ACCESSED

Accountability

We own the outcome, not just the task.

Commitment

Schedules and standards are promises.

Competence

Certified people, correct procedures.

Execution

Delivered, inspected, handed over.

Five integrated capabilities.

One contractor across the asset lifecycle, from surface preparation and coating to pipeline construction, fabrication, maintenance and materials supply.

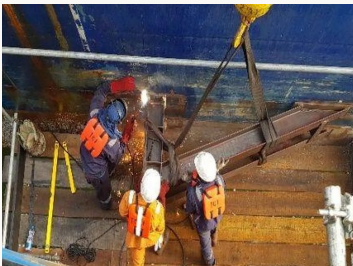

01 Coating & Corrosion Management

Grit blasting to Sa 2.5, tank internal and external lining, protective and marine coating systems, cathodic protection design and installation, thermal insulation and coating surveys.

02 Pipeline Construction & Integrity

Right-of-way clearing, stringing and welding, sectional replacement, hot-tap and saddle welding, hydrotesting, leak repair and integrity assessment across onshore networks.

03 Fabrication & Marine Services

Structural and mechanical fabrication, pipe spooling, deck workshops and modules, vessel and rig repair, anti-piracy hardening, scaffolding and rope access.

04 Facility Maintenance & Upgrade

Tank rehabilitation, turnarounds and shutdown support, brownfield modification, flow-station and power-plant maintenance, NDT inspection programmes.

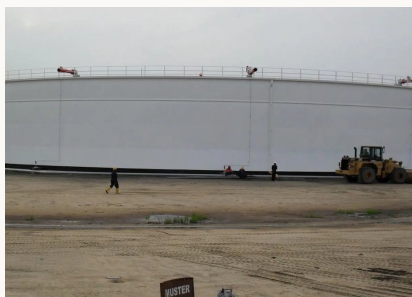

05 Procurement & Supply

Coatings, line pipe, fittings, valves, welding consumables, safety equipment and skilled manpower, sourced to API, ASME, ASTM and ISO specification.

Selected projects.

A representative extract from more than twenty-five completed scopes for operators, EPCs and marine owners across Nigeria.

Escravos Terminal

BAYWOOD DEXTRON / CHEVRON NIGERIA

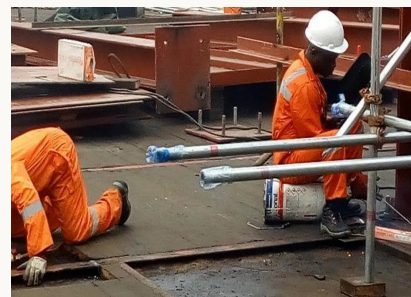

Grit blasting, coating and full rehabilitation of crude storage tanks 3, 5 and 9, including internal lining, external systems and safe-work interfaces inside a live terminal.

Aba to Enugu System 2E

NNPC / NIGERIAN PIPELINE STORAGE CO.

Right-of-way clearing, sectional replacement, saddle welding and integrity works on a strategic products pipeline, delivered with full documentation.

Teras Conquest

TERAS OFFSHORE PTE LTD

Multi-year offshore programme, deck workshop fabrication, TC-HLV catchers, waste skips, anti-piracy hardening and marine repairs delivered to class.

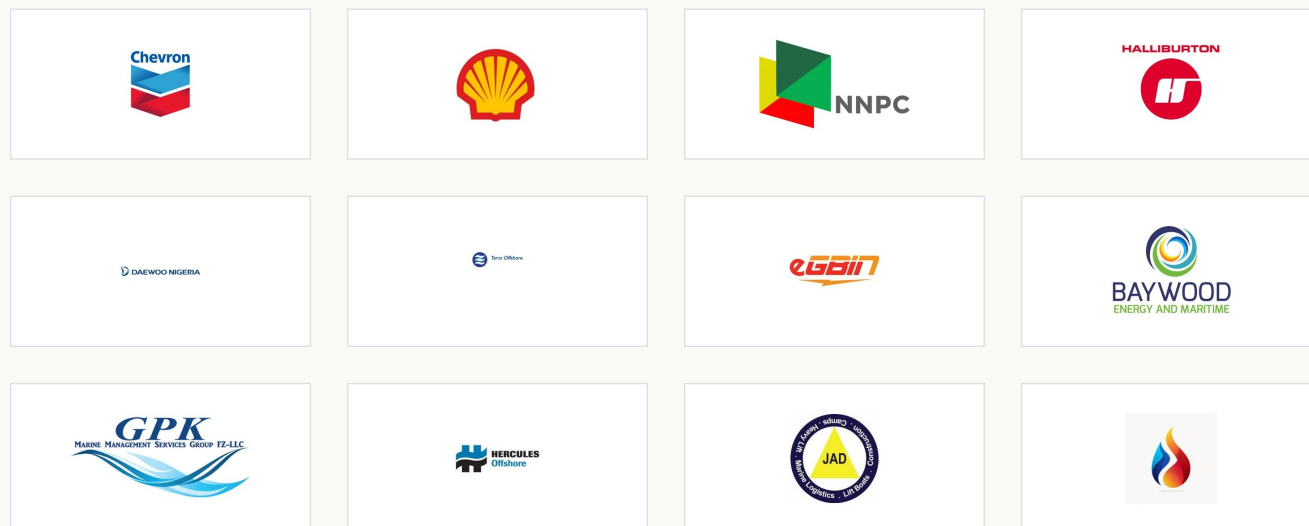

PROJECT REGISTER, EXTRACT

SCOPE	CLIENT	YEAR	SECTOR
Tank 5 grit blasting, coating & painting	Baywood Dextron / Chevron	2023	Coating
Tank 9 rehabilitation & coating	Baywood Dextron / Chevron	2022	Coating
Power-plant header maintenance	Egbin Power Plc	2022	Power
Tank 3 coating campaign	Chevron Nigeria Ltd	2021	Coating
Turbine casing coating	Egbin Power Plc	2021	Power
Riser coating repairs, offshore	Shell SNEPCo	2020	Coating
Cathodic protection installation	Egbin Power Plc	2020	Coating
Deck workshop fabrication	Teras Offshore Pte Ltd	2019	Marine
Facility turnaround support	Halliburton Energy Services	2019	Power
TC-HLV catcher installation	Teras Offshore Pte Ltd	2018	Marine
Aba to Enugu System 2E integrity	NNPC / NPSC	2017	Pipeline
Vessel shell & deck-wing repairs	GPK Marine Management	2016	Marine
Onshore pipeline construction	Shell SPDC	2014	Pipeline
Structural steel fabrication	Daewoo Nigeria Ltd	2013	Marine
Tank farm cleaning & rehabilitation	Stolt Offshore / Globestar	2018	Coating
Flow-station maintenance	Shell SPDC	2017	Pipeline
Brownfield modification package	Chevron Nigeria Ltd	2016	Coating
Scaffolding & rope-access services	Teras Offshore Pte Ltd	2014	Marine
NDT inspection programme	Halliburton Energy Services	2013	Power
Corrosion survey & scheduling	Chevron Nigeria Ltd	2012	Coating

CLIENTS & ASSETS

Trusted by the operators.

We work directly and through EPC partners for Nigeria's leading operators, service companies and marine owners, using our own fleet of blasting, coating, welding and lifting equipment.

OWNED EQUIPMENT, AVAILABLE FOR HIRE

Blasting pots

Pressure vessels, 100 to 300 kg capacity, dead-man control

Air compressors

185 to 900 cfm diesel screw compressors, oil-free options

Airless spray units

Heavy-duty pumps for high-build epoxy and PU systems

Welding machines

Diesel and electric sets, SMAW, GTAW and FCAW

Cranes & lifting gear

Mobile cranes, chain blocks, certified slings and shackles

Scaffolding & access

Cuplock and ringlock systems, rope-access teams

PROCUREMENT & SUPPLY

A seven-category oilfield catalogue with guide pricing.

Coatings, pipeline and piping, fabrication and marine, safety and PPE, instrumentation, civil and electrical, and manpower.

WHY CLIENTS RETURN

Own fleet

No dependence on third-party plant, so mobilisation is fast and rates are firm.

Certified crews

Coating inspectors, certified welders, riggers and rope-access technicians.

Documented delivery

ITPs, coating reports and as-built records handed over with every scope.

Safety and quality are the deliverable.

Every scope begins with a documented job hazard analysis, permit-to-work compliance and a toolbox briefing, and closes with inspection records, coating reports and as-built documentation. Our quality management system follows the ISO 9000 to 9004 series, and technical work is executed to API, ASME, ASTM, AWS, AWWA, NFPA and BS codes.

Zero lost-time injury target

Statutory and client HSE compliance on every site.

Certified personnel

Coating inspectors, welders and rope-access crews.

Documented QMS

ITPs, inspection records and traceable material certification.

Nigerian content

Indigenous capacity aligned to NCDMB expectations.
